Company Overview

The company is a VC-funded mobile advertising company, focusing on dynamic ad insertion technology for Mobile TV and applications. The company is looking for a hands-on mobile software expert to be responsible for the company's handset architecture. This is an opportunity to get in on the ground floor and make a significant contribution to the company's technology offering.

Job Description:

- The Technical Product Manager will be responsible for creating PRDs, roadmaps, use case definition, milestone tracking (internal and customer delivery) and product strategy
- Work closely with business and engineering teams to help define product releases and features.
- Front end technical presentations with customers worldwide
- Work with customers / partners to spec out deployment roadmaps

Desirable Experience:

- Bachelors or Masters in Computer Science or related area. (MBA is a plus)
- 8+ years background in mobile software - technical product management or product architecture
- Hands-on experience in deployment of client-server mobile products
- Experience with rich media and video delivery to mobile over unicast and broadcast networks
- Familiarity with agile software development methodologies
